Electric Guitars, Electric Bases, Amplifiers, Effects & Accessories 2010

Ibanez
Electric Guitars, Electric Bases,
Amplifiers, Effects & Accessories
2010

A great live sound is the result of hard work - from the decisions that go into developing and refining it, all the way to the experience it takes to successfully reproduce it night after night. It's also a result of choosing the right gear. Gear that sounds the way you need it to - consistently, dependably, affordably.

Here at Ibanez we understand what it takes to build great sounding gear. We work closely with the artists that use our products every day to make sure we stay on top of the changing needs of modern musicians. We see it as our job to produce relevant, affordable solutions for every application.

Allow us to welcome you to our 2010 catalog and invite you to take a look around. As you flip through it's pages, you may be surprised at how many of your favorite artists are using Ibanez. Oh, and while you're here, be sure to check out the RGA series electric guitars. With active pickups, active eq, and a new arched top design, these lightweight axes are a pleasure to play and offer nearly unlimited tonal possibilities.

Seeking something heavy? The RGD series is literally made for you. These guitars, including a 7-string model, are actually designed for down-tuning. The days of floppy strings are officially over. Let a new era of speed, accuracy, and sonic brutality begin!

Great tone starts with great gear. Shape yours with Ibanez!

Prestige

Precision, Performance and Playability.

Everything you've ever dreamed of in a guitar or bass.

These are 3 principles behind our new Ibanez Prestige line.

Combining high tech manufacturing techniques with old world craftsmanship, true innovation in design and construction and the incorporation of ideas and

suggestions from musicians from around the world are cornerstones of the Prestige production process.

Precision

High tech manufacturing techniques allow the highest levels of precision in terms of ensuring the tightest tolerances in wood work, paint and hardware design and construction.

Neck Joint

All Prestige models are "Made in Japan" with the finest Ibanez craftsmanship.

Performance

Ibanez guitars have always been known for their high performance fast necks, optimized pickups and electronics and advanced bridges and hardware. With Prestige, all of these components are continually tweaked and taken to the cutting edge.

Hardware

Originally designed Ibanez hardware and parts, from bridge and pickups to nut, built to work together precisely.

Playability

All of this means nothing without supreme playability. Years of research and testing out in the field with artists all over the world helped us to develop the three distinctively unique high performance neck shapes for electric guitar and one for bass. In the Prestige line, there is now a perfect neck shape for every type of player. The Super Wizard HP, Wizard HP and ULTRA HP for guitar and ATLAS HP neck for bass.

Neck Shape

Each series of Prestige features the best suited neck shape for the player's tastes.

RGA *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS

The RGA archtop guitar not only has curves but playability. And for live performance, its lightweight body gives players more freedom to move on stage. The arched top also allows players to knock down heavy riffs and power chords without hitting the guitar body. Curved beauty and great performance combine gracefully in the RGA.

RGA Active EQ

This EQ allows for everything from massive fat low tones to sharp treble tones through the turn of one knob with almost no change in output volume. The tone changes in a smooth and natural curve, so it's easy and quick to find the sound you're looking for.

LZ4 Pickups

The LZ4 is an original Ibanez active pickup with a wide dynamic range. It produces powerful and clear humbucker sound with low noise.

- Hardware color : Cosmo Black
- Scale : 648mm/25.5"
- Color : TGB (Transparent Gray Burst)

LZ3 Pickups

The LZ3 is also an original Ibanez active pickup, but with higher output than the LZ4. It produces a fat sound with good clarity perfect for distortion sounds.

RGA Active EQ

Specially designed to function with the fat and strong LZ3 pickups, the output is controlled by an active circuit to provide pure tone free of noise.

Brian Leppke
Bleeding Through

FX EDGE III-8 Bridge

Ibanez FX EDGE III-8 double-locking fixed bridge was made specifically to handle and augment the awesome extended range of the RGA8 8-string.

Gibraltar Standard Bridge

The Gibraltar Standard is a simple fixed bridge that was designed to adhere firmly to the guitar body and make good transfer of the string vibrations. It is also incredibly smooth for maximum playing comfort.

RGD *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS

As a pioneer of heavy rock guitars, Ibanez has released 7- and 8-string models in the past. This year we release the RGD, Ibanez's new heavy metal machine.

Heavy rock guitars are required to output clear sound down to the lowest note without losing playability. So we kept the neck scale to a 1-inch minimum between frets, and original tuned pickups are mounted.

Heavy rock guitarists usually hold their guitars low, and the sharp-shaped RGD body achieves good balance and easier access to high frets for low-slung players.

RGD2120Z CSM

- 5pc Wizard HP Maple/Walnut neck w/KTS™ TITANIUM Reinforcement
- Basswood body
- Jumbo frets
- Edge-Zero bridge w/ZPS3
- V7 Custom (H) neck pu

New Pickups for RGD

The V7/V8 Custom pickups on RGD Prestige models were specially designed and tuned for capturing more low-end, by regenerating a wider tonal range. Instead of losing the low-end, they output it with a rich, harmonic tone.

ALL Prestige features

Prestige Precision, Performance and Playability.
Everything you've ever dreamed of in a guitar or bass.

Collet Knob

Designed for great looks and engineered to avoid the risk of coming off while you're playing. The non-slip functionality gives this collet knob accurate axis rotation and control for any player.

Tool

The all-purpose maintenance tool is included with all Prestige models.

RGD/Special Horn Cut

The RGD offers ultimate playability, with a beveled body cut for extreme shredding and rifting, and extra horn cut for lightning fast upper fret access.

RG *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS

The RG is the most recognizable and distinctive guitar in the Ibanez line. Forged in the fires of 80's metal, this high-performance machine was built with speed and strength in mind. Whether using a locking tremolo with a sharp action knife edge or a hard tail bridge, the RG is a precision instrument.

DiMarzio® Pickups

The RG3570Z and RG3550MZ also feature the DiMarzio® Tone Zone® in the bridge position, True Velvet™ in the middle position, and the Air Norton™ in the neck position. With colored bobbins, these pickups add the flair of the 80's music scene to these modern designs.

RG Prestige /Super Wizard HP Neck

Refined super-fast Prestige Wizard neck for ultimate shredders – 17mm width at 1st fret and 19mm at the 12th.

RG3550MZ GK

- 5pc Super Wizard HP Maple/Walnut neck *Prestige* w/KTS™ TITANIUM Reinforcement

Edge-Zero Tremolo

The Edge-Zero has a sharp knife-edge for extremely accurate tremolo playing. This tremolo also uses Ibanez innovations to keep string action constant and the bridge surface smooth. The specially designed arm socket prevents unnecessary wobble from the arm while providing full control over the arm's torque.

V7/S1/V8 Pickup

The RG1570Z/RG1550MZ can dial in any tone, from crystal clear to searing and nasty, thanks to its V7 neck pickup, S1 middle pickup and V8 bridge pickup combination.

Neck-Thru Construction

Neck-thru construction on the RGT provides massive sustain and playing comfort.

EMG® 81/85

The RGT6EX, RGT6EXFX feature EMG® 81/85 active pickups.

Edge III Tremolo

Ibanez has long been admired for the Edge tremolo, and the Edge III embodies all of the classic function of the original Edge with some modern updates. It features lower profile fine-tuners, much like the Lo-Pro Edge. There are also two screws in the arm pocket for easy adjustment of the arm height and torque.

S Prestige

CRAFTED BY JAPAN'S FINEST LUTHIERS

The S Prestige series is "Made in Japan" by the finest Ibanez craftsmen and from top-of-the-line components. This beautifully contoured shape, combined with the ZR-2 tremolo system, produces warm resonant tones from a super thin mahogany body.

HGD & ST Pickups

The Hot Grinder pickups are specially designed for the S Prestige to output extra volume, yet sharpness is not sacrificed. The new Short Tracer pickup matches perfectly with the hot humbuckers to give versatility on the S guitars and to produce even the most delicate tones.

FR *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS
 The FR first appeared in 2008. With a simple and uncompromising design, the FR is a chameleon when it comes to musical genres. The ash body brings more punch to the midrange tones, while the Tight-End bridge provides maximum string vibration and playing comfort.

CCR Pickups
 The Ibanez original CCR pickups don't have the same heat of ceramic magnets, but still have the power to cut through the mix.

SV *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS
 The S series has long been admired for its design, but some players prefer the simplicity of a non-locking tremolo. The SV was created to satisfy the professional player, who wants a more versatile solution. The SynchroniZR non-locking tremolo uses the same smooth ball bearing mechanisms that have made the ZR bridge so popular. The SV also comes equipped with the True-Duo pickup system for superior tonal variety from the single coil and humbucker universe.

True-Duo Pickups
 The unique formula of the True-Duo system, the combination of Alnico and Ferrite, stacked coils and bar magnet, has answered the conflicting demand for one guitar. In the SSS setting, it outputs glassy and clear single coil sound, not like a coil tap does, while the HSH setting packs a beefy punch, by simply pushing/pulling the volume knob.

SV/Machine Head Auto-Trim Tuner
 Smart design cuts the excess string after you re-string and tune up – no extra cutting tool needed!

SV/Graphtech® Nut
 The Graphtech® nut on the SV models offers ultimately low friction to keep you in tune and gives clearer sound and sustain.

SA

You want versatility? The SA adapts to any genre of music for clean rhythm, crunchy blues or even hard-driving riffs and solos. It also offers a variety of looks such as metal-like solid color or traditional wooden finishes. The SA also makes use of the same True-Duo pickup system available on the SV models and the abundant resonance of the SAT-Pro tremolo.

Sat Pro II Tremolo

The Sat Pro II eliminates unnecessary resonance around the saddles by firmly securing them to the bridge plate. This keeps the saddles very stable even during frequent tremolo use.

DN DARKSTONE

The DN is the new standard in heavy metal rock guitar. As its “Darkstone” series name suggests, strong construction and smart body style combine for a powerful, clean sound. The Tight-Tune Bridge is sturdy and resonant, and the tailpiece comes equipped with the Ball-End Stopper for more lock-in on strings – both are features originally designed by Ibanez.

HS1 Pickups

The newly developed humbucker-sized single coil pickups produce loud and crunchy tones that cut through for hard rock and punk styles.

DN600 SHM

PP1 Pickups

The tube pole-piece construction of the new pickups designed for the Ibanez Darkstone offers quick response, sparkling clarity and added harmonics for a humbucker sound.

Escutcheon

The original pickup mounting ring, specially designed for the Darkstone, keeps the pickup parallel to the strings at all times. Unlike the usual mounting rings, this one enables the pickups to catch equal vibrations from each string and avoid tone loss.

Set-In Neck Construction

Set-In Neck construction on the DN-series provides massive sustain and playing comfort.

Tight-Tune Bridge/Tailpiece

Solid as a rock, the Tight-Tune bridge and tailpiece were designed to lock down securely and prevent any kind of wobble or movement. Each saddle is locked into the base plate, and the bridge is anchored by stud bolts into the body of the guitar. Furthermore, the studs are also locked onto the base plate so that the maximum vibration from the string is transferred to the body.

ART

Simple and effective, the ART is a classic single-cutaway guitar that was built for modern metal. The mahogany body is capable of producing the warm tones of yesterday, while the active low-impedance pickups can handle massive volume levels with very little noise.

LZ1 Pickups

Ibanez original LoZ pickups have made the active pickup sounds accessible for anyone from starters to professionals. Operated by AA batteries, which are more widely available than traditional 9V batteries.

Caiman Finish

The ART300 features the Caiman finish, a unique texture created by the scalloped top. This unique top combined with dark stained finishes has the look of reptilian skin.

Gibraltar III Bridge/Quik Change III Tailpiece

With the addition of the Quik Change III tailpiece, string changes are a snap on the Gibraltar III bridge. Its simple rigid design is perfect for harder playing styles.

X SERIES

With the advent of the X series, Ibanez reintroduced non-traditional guitar shapes back into the mix. These off-the-wall shapes stand out in a crowd, but they are also excellent examples of form meeting function. The XPT was developed for the extreme shred player with its fast neck and tremolo system. The ICT is great for hard rock, where thick tones are literally beaten out of the guitar. The DTT is a high gain animal, cutting through the most dense forests of fuzz and distortion.

AR ARTIST

The AR is a classic among Ibanez guitars. It was one of the first original designs produced by Ibanez and continues to be a sought after guitar. The AR300 continues that legacy with pride.

Tri-Sound Sw

The AR300RE's original Tri-Sound switching system offers the choice of standard humbucking, single coil, or parallel humbucking sounds through the mini switches. Combined with the regular pickup selector, 15 distinct tone settings are available at your fingertips.

JTK JET KING

Some people never forget that first prized guitar that they found at the local pawnshop, and with the JTK they'll never have to. The Jet King takes all the retro styling of a vintage guitar and couples it with solid, modern hardware. Ibanez also developed original low-noise pickups for the Jet King that reproduce the old-school look and sound of soap bar pickups.

HFS Pickups

The HFS PU looks like a vintage single coil at first glance, but looks can be deceiving. Underneath, the HFS makes use of a separate coil to cancel any hum or noise generated by the single coil.

ARTCORE

The Artcore line represents a step forward in the evolution of affordable hollow body guitars. Since 2002, Ibanez has been producing these exquisite guitars that are at home in a jazz combo as well as a full-on rock show. Like many other Ibanez models, the Artcores are as versatile as they are beautiful. They come in a variety of sizes and hardware configurations to meet the needs of the one at a price fit for all.

Custom Fret Edge Treatment

ARTCORE Custom Neck
Artcore Custom models feature 5pc maple/walnut neck for extra strength and stability.

U-Nam

VBF70 Vintage Vibrato

This old school vibrato adds country and rockabilly nuances to the rich tone of a full-hollow guitar, but the included roller saddles eliminate "old school" tuning problems.

*VBF70 Vintage Vibrato design licensed by Fred W. Gretsch Enterprises, Ltd. in the U.S.

AF

The AF is the most traditional of the Artcore series. The traditional full-hollow construction means there are no sound blocks in the body. Producing rich and complex tones, the AF is the guitar for the purist in all of us.

AF95PV TK

- 3pc Artcore Mahogany/Maple set-in neck
- Flamed Sycamore top/back/sides
- Medium frets
- ART-1 bridge
- VT100DX tailpiece

- Depth : 70mm at tail
- Color : BS (Brown Sunburst)

Chris Camozzi
Michael Bolton

Eric Krasno
Soulive

AK

Jazz and blues history is filled with the warm tones of large hollow body guitars. The AK escapes from the bright sound of maple tops and metal bridges, replacing them with a spruce top and an all-wood bridge.

AK/20Frets

The traditional 20-fret fingerboard offers just the right placement of the neck pickup, for warmer tone.

AK80 BS

- 3pc Artcore Mahogany /Maple set-in neck
- Spruce top /Sycamore back/sides
- Medium frets
- ART-W wooden bridge
- VT60 tailpiece
- ACH1 (H) neck pu
- ACH2 (H) bridge pu
- Hardware color : Chrome
- Scale : 628mm/24.75"
- Depth : 70mm at tail
- Color : BS (Brown Sunburst)

AK95 DVS

- 3pc Artcore Mahogany/Maple set-in neck
- Spruce top/Sycamore back /sides
- Medium frets
- ART-W wooden bridge
- VT100DX tailpiece
- ACH1 (H) neck pu
- ACH2 (H) bridge pu
- Hardware color : Gold
- Scale : 628mm/24.75"
- Depth : 70mm at tail
- Color : DVS (Dark Violin Sunburst)

AG

The AG has a slightly smaller body width than the more traditional AF dimensions. However, the same depth and true full-hollow body construction make for a big standout sound.

AG75 BS

- Artcore Mahogany set-in neck
- Maple top/back/sides
- Medium frets
- ART-1 bridge
- VT60 tailpiece
- ACH1 (H) neck pu
- ACH2 (H) bridge pu
- Hardware color : Chrome
- Scale : 628mm/24.75"
- Depth : 70mm at tail
- Color : BS (Brown Sunburst)

AG96 DHS

- Flamed Maple top/back/sides
- Medium frets
- ART-1 bridge
- VT100DX tailpiece
- ACH1 (H) neck pu
- ACH2 (H) bridge pu
- Hardware color : Gold
- Scale : 628mm/24.75"
- Depth : 70mm at tail
- Color : DHS (Dark Honey Sunburst)

AFS/Body Comparison

The AFS body features full-hollow construction, offering traditional jazz tone and midrange punch, yet it's thinner than traditional jazz boxes for easier playability.

AFS

Pushing traditional concepts one step further, the Ibanez AFS has the same shape and full-hollow body of the AF. For increased comfort and more midrange punch, the body depth is one inch thinner. An Ibanez Vintage Vibrato is also mounted on the body with roller saddles, eliminating the tuning problems of traditional systems.

AFS75T TRD

- Artcore Mahogany set-in neck
- Maple top/back/sides
- Medium frets
- ART-2 Roller bridge
- VBF70 vibrato
- ACH1 (H) neck pu

AMF

AMF is the newest model in the Artcore series. With AMF, Ibanez aims to bring the tones and looks of traditional hollow body guitars into more modern musical realms.

AMF73 TF

- Artcore Mahogany set-in neck
- Maple top/back/sides
- Medium frets
- ART-1 bridge
- ACH1-S (H) neck pu
- ACH2-S (H) bridge pu
- Hardware color : Chrome
- Scale : 628mm/24.75"
- Depth : 43mm at tail
- Colors : BK (Black)
TF (Tobacco Flat)

AMF73 BK

- Artcore Mahogany set-in neck
- Maple top/back/sides
- Medium frets
- ART-1 bridge
- ACH1-S (H) neck pu
- ACH2-S (H) bridge pu
- Hardware color : Chrome
- Scale : 628mm/24.75"
- Depth : 43mm at tail
- Colors : BK (Black)
TF (Tobacco Flat)

AMF/Body Thickness

The AMF body is flat-top and slender with semi-hollow construction, offering a bit more solid rock feel, yet warmer tone than a solid electric guitar.

SR *Prestige*

CRAFTED BY JAPAN'S FINEST LUTHIERS

The SR Prestige is the pinnacle of playing comfort, smart design and Japanese craftsmanship. All SR Prestige models are "Made in Japan" by the finest Ibanez craftsmen and from top-of-the-line components. They feature the Mono-Rail bridge design, with complete string-to-string isolation so that each string vibrates without interference from other strings, the newly developed Power Curve III EQ for vitalizing the low-end and midrange tones, and the same classic slim neck that has become an industry standard over the past 20 years.

Power Curve III EQ (on SR Prestige)

The Power Curve III 3-band EQ was developed specifically for our SR Prestige line. The Mid Q control makes adjustment of the core of your bass – the mids – extremely simple, and the +/- 12dB EQ variable range enables a more natural sounding bass tone. Equipped with an EQ On/Off switch that outputs directly from the Bartolini® pickup.

MR4 Mono-Rail Bridge

The Mono-Rail Bridge is the ultimate in string isolation for bass. Each saddle is independently and securely locked down to the body for maximum vibration transfer and no interference. One screw controls the height of each saddle for easy adjustment.

Gerald Veasley

Bartolini® MK1 Pickups

The MK1 pickups are split coil designs that provides a very wide frequency range and enhanced definition for maximum accuracy. The Neck and Bridge pickups have equal response, like traditional single coils, but without the hum and noise.

Since 1987, musicians all over the world have come to know the playing comfort and unique sound of the SR bass. This year's lineup includes a wide array of options sure to fit just about any style of music. With 3-band EQ and its newly developed Mid-Frequency Select switch, or the Style Sweeper 3-band EQ controls, the SR basses can produce any sound you require.

Jatoba/Bubinga Slim Neck

Coupling Jatoba with Bubinga has made the neck strong and stable despite its thinness.

SR 5/6 string

3-Band EQ, Style Sweeper Controls

With the Style Sweeper 3-Band EQ controls, you can boost mids for a plucky finger sound or scoop them for a resonant slap sound with the turn of a knob.

GSR

There are wide variations among our GSR series guitars. The GSR200 combines straight ahead sounds with the high playability of an SR. The GSR200EX gives a punchier sound, and the GSR180 produces delicate but strong tones. Our Jumpstart Bass Package (see also P. 68) features a GSR electric bass and all the accessories you need to get up and jamming right from your first day.

SRX

The SRX is the muscular big brother of the SR series. This is a bass that was designed for heavier playing styles, and it meets that demand in a no-nonsense layout. The EQB-II DX 2-band EQ makes it easy to find various sounds, and the now-famous stock Ibanez PFR pickups, which major artists rave about, are right there to give you that extra punch.

PFR Pickups and EQB-II DX EQ

These powerful full-range passive pickups generate high output with extra low midrange punch. The EQB-II DX 2-band EQ enhances heavy tones with simple operation.

BTB

The concepts behind boutique basses are often the justification for making them extremely expensive. With the advent of the BTB however, Ibanez decided that these same concepts of well-selected body materials, 35" neck scale, and deep cutaways could be applied to an instrument that anyone could afford. All the BTBs feature neck-thru construction and deeper cutaways for enhanced playability and balance. This year, new BTB 700DXs, featuring EMG® pickups, join the lineup (other models feature Bartolini® MK2 pickups with EQ).

- Elixir® strings
- Hardware color : Black
- Scale : 889mm/35"
- Color : TKF (Transparent Black Flat)

BTB70x/EMG® Pickups

The EMG® 40DC pickups produce a deep low end while maintaining clarity with very low noise.

Bartolini® MK2 Pickups and EQ

The MK2 pickups are quad coil designs. The Neck pickup tone is very deep and the Bridge pickup tone is bright, just like the US made pickups. They are also balanced for output so that the deep tone Neck pickup does not overpower the Bridge pickup. The MK2 electronics compliments and enhances their wide tonal range.

ATK

The ATK may be the most straightforward bass in the entire Ibanez line. This simple rock n' roll bass with a punk attitude combines a large ash body with a maple neck for big, tight sounds. The special ATK triple coil pickups can only be found on these basses. Coupled with the 3-band EQ, this bass can generate some serious low-end punch.

JTKB

If you want a bass that transports you back to hot rods and 60's rock n' roll, then the JTKB is your golden ticket. Its mahogany body, high-powered pickups and solid bridge can take a beating and still produce the warm, smooth sound of a vintage bass. This year, the new JTKB300, featuring three single pickups, joins the lineup. The JTKB is truly unique among Ibanez basses.

JTKB300 WH

- 3pc JTKB Maple neck

- Scale : 864mm/34"
- Color : BS (Brown Sunburst)

PSJ Pickups

JTKB300 features three single pickups, each with its own on/off switch, enabling seven variable selections and a wide range of sound possibilities.

1 Volume, 1 Tone (JTKB300)

2 Volume, 1 Tone (JTKB200)

ARTB

For those who prefer a bass that has a more classic feel to it, the ARTB is a 70's style rock machine. The combination of mahogany body, 30" short scale length and set neck create a warm tone that recreates the days of arena rock. The short scale neck is also comfortable for smaller hands.

2 Volume, 1 Tone (ARTB)

6 Band Graphic EQ

Promethean series amps feature 6-band Graphic EQ that allows you to make precise tonal adjustment in any type of environment. Each frequency is carefully selected to be the most demanded by bass players. The 6-band EQ can be bypassed by a selected switch.

Vibe Control

Control tonal character from creamy vintage sounds to modern sounds. Also, the On/Off push switch allows you to change playing character, from walking to picking and/or slapping, instantly. (On/off can be controlled by optional IFS2X footswitch.)

Aux/Phones

The included aux input allows you to play along with a connected MP3 or CD player. With headphone out, it's great for bedroom jam sessions or sound check at rehearsal.

Line Out

The balanced XLR output sends a balanced signal to the mixing console and/or main PA system in any live or studio situation. Pre- or Post EQ switchable and GND Lift switch-equipped along with switchable level control to avoid ground loops with other connected equipment.

Speak Loud And Carry A Small Amp

promethean

Ibanez Bass Amplifiers

One might never imagine that a small amp could produce big sound, but in terms of the Ibanez Promethean Bass amp series, that is not the case. The Promethean series amp is designed for busy working musicians who travel around from one venue to the next. Within its compact body, the Promethean features **CRITICAL** functions in order to deal with various situations and requirements in a live environment. It also gets **LOUD!!!** The working musician has it easy with the Promethean amp, a dependable workhorse of an amp.

Detachable Amp Head (P5110/P5210)

The P5110 and P5210 amp head can be easily detached without any tools. Due to its compact size, it's efficient to take it out anywhere you need to go.

P5110

Bass Combo Amplifier

- output power 250W@8Ω/500W@4Ω
- speaker unit 10" Ceramic Speaker, Dome Tweeter
- controls Mute Switch, Gain, Low/High Control, 6 Band Graphic EQ, Vibe Control, Master Volume
- i/o's Input, Aux Input, Phones Out, Tuner Out, Balanced Line Out (XLR), Footswitch Jack (Mute/Vibe)
- cabinet Ported Bass Reflection Cabinet/Tilt-up System
- size 326(W) x 332(D) x 360(H) (mm)
- weight 12.5kg

The P5110 delivers 250W@8Ω while using individually. Along with the P110C speaker cabinet, it delivers 500W@4Ω in total.

IFS2X

Footswitch

Latching footswitch with metal housing for use with the P500H and P5110. (The IFS2X is not included and is sold separately)

P500H

Bass Amplifier Head

- output power 250W@8Ω/500W@4Ω
- controls Mute Switch, Gain, Low/High Control, 6 Band Graphic EQ, Vibe Control, Master Volume
- i/o's Input, Aux Input, Phones Out, Tuner Out, Balanced Line Out (XLR), Footswitch Jack (Mute/Vibe)
- size 280(W) x 265(D) x 57(H) (mm)
- weight 2.9kg

P115C

Speaker Cabinet

- 300W
- 15" Neodymium Speaker
- Horn Tweeter
- SPEAKON® Combo Jack
- Ported Bass Reflection Cabinet
- 604(W) x 450(D) x 620(H) (mm)
- 24.8kg

SOUND WAVE

The SWX Sound Wave Bass amp series is designed for today's bass players at all levels, who want serious versatility. The SWX delivers a thick, natural and balanced tone, while its perfect combination of function allows you to change the tonal character without any hassle. Playing the Sound Wave will give you what you need for the groove, the drive, the pocket and the tones - whether you need traditional thump or today's pop, slap and funk.

Internal Auto Compression Circuit

All Sound Wave SWX series bass amplifiers are equipped with internal auto compression circuitry, which minimizes distortion and keeps the sound clean and powerful. (SWX20 does not equip LED for Auto-Comp)

Bright Switch

Selectable Normal and Bright modes change the sound character immediately, from the tone of passive bass to that of active bass.

TROUBADOUR

ACOUSTIC GUITAR AMPLIFIER

What's the one thing that almost all small venue musicians strive for when it comes to amplifiers? Some might say "pure immersive tone", which would undoubtedly be followed by "portability". The Ibanez T-Series Acoustic Guitar Amplifiers deliver exactly that, along with the striking appearance of a hand crafted boutique amplifier. Whether you're strumming away at the local coffee shop or playing weekly gigs at a religious venue, the sounds of the T-Series will fill the room. Plus, you won't have to break your back getting your amp in and out. The Ibanez T-Series was designed with portability in mind.

Dual "MODE" Switch

The natural mode produces rich, warm acoustic sounds with shimmering overtones perfect for fingerstyle playing. The shaped mode scoops the mids, producing an open sound with a tight bottom end for strumming styles.

Chorus

All Troubadour Series Amplifiers feature chorus with soft natural mids and crystal clear highs.

Mic Input

The mic input features a totally independent mic preamp, so it won't be colored by any effects going through the guitar side. It also features independent tone and volume controls.

CD/AUX Input

The included aux input allows you to play along with a connected MP3 or CD player, great for bedroom jam sessions or rigorous woodshedding.

X Tone Blaster

The new generation Tone Blaster X series amps were designed and created to answer the needs of today's guitarist. The parametric mid EQ allows you to dial in any tone you're looking for in an instant. The exclusive X mode allows you to get monstrously heavy and lets you cut through the din of the loudest rhythm section. The gain control in the normal channel can be dialed down to give you anything from a clean jazz tone to a crunchy, slightly overdriven rock'n roll tone. Plug in and express yourself with TBX.

TBX150H

150W Guitar Amplifier

- output power 150W@4Ω
- controls Normal Channel - Overdrive Switch, Gain, Bass, Middle, Treble, Volume, Reverb Level

MIMX

Traditional companies provide versatility and warm vintage tones with their modeling amps, but only Ibanez brings you the same versatility plus the heavy, searing modern tones required by today's players. The MIMX amps offer a wider variety of distortion and overdrive than any other modeling amp currently available, and there's still plenty of classic and clean tones to get you through any gig.

MIMX150H

150W Fully Digital Modeling Head

- 150 watt @ 4 ohms
- Fully digital programmable preamp with 11 amp models
10 memory locations
50 rhythm patterns
13 digital effects
- Accessory compartment
- 636(W) x 252(D) x 259(H) (mm)
- Weight : 13.9kg

IFC2

Effects Foot Controller

The PEDAL FX section is ONLY accessible using the optional Ibanez IFC2 Foot Controller for MIMX150H/MIMX65. (The IFC2 is not included and is sold separately)

IFS4X

Footswitch

Latching 4-button footswitch with metal housing for use with the TBX150H/TBX150R.

IFS2X

Footswitch

Latching footswitch with metal housing for use with the TBX30R, TBX65R and T35.

MIMX65

65W Fully Digital Modeling Combo

- 65 watt guitar amp
- 12" Ibanez IS1204G speaker
- Fully digital programmable preamp with 11 amp models
10 memory locations
50 rhythm patterns
13 digital effects
Chromatic Tuner
- 1/4" CD/MP3 input jack
- 1/4" headphones/record out jack
- Closed-back Cabinet design
- 491(W) x 254(D) x 451(H) (mm)
- Weight : 16.2kg

- 11 amp models with the widest amp/tonal type variation available. Features ten of the classic British, American and boutique amp models plus a new and original Ibanez high-gain "Psycho" model.
- 10 programmable patches! Any combination of settings can be auditioned and adjusted in real time and then saved to any one of the 10 memory locations. This includes amp model, equalization setting and digital effects and their particular parameters.
- 50 rhythm patterns. Wide range of rhythms for any kinds of practice, recording or single gig : metal, Latin, hip-pop, ballad, shuffle, hard rock and much more.

- 13 digital effects (up to three effects simultaneously): including five Expression Pedal-type Effects Accessible via the OPTIONAL Pedal Controller : VOLUME, RING MODULATOR, AUTO RESONANCE, WAH-WAH and PITCH SHIFT.
- You can choose one of the four Modulation Type Effects : CHORUS, FLANGER, VIBRATO or STEP.
- And one of Delay/Reverb Type Effects : DELAY, ECHO, HALL or ROOM REVERB.
- Plus a built-in fully chromatic tuner!

IBZ10G

Guitar Amplifier

1. LED Lit Controls
Each side includes drive, tone and level controls with LED indicators around each control and a LED bright/save control switch for daytime use or saving the battery.

2. Steve Vai Signature Foot Pedals
Steve's trademark logo is imprinted on the Jemini's foot switches.

3. Heavy Duty Aluminum Housing
The housing is finished off with Steve's infamous trademark swirl paint job.

While the tube in many 9-volt tube-overdrive pedals merely functions like a filter, the TK999 Tube King and its crown jewel 12AX7 tube get genuine high voltage, just like a tube preamp. The result ? The Tube King can make any solid-state amp sound just like a tube amp, with massive, tight overdrive/distortion.

TK999OD Tube King Overdrive

- Genuine High Voltage Tube Overdrive
- 3 band EQ with presence
- Gain and level controls
- Hi/Lo input switch
- AC Adapter included

TK999HT Tube King Distortion

- Genuine High Voltage Distortion Pedal
- Actual 12AX7 Tube
- Active EQ plus Presence Switch
- VOID Control
- AC Adapter included

AIRPLANE FLANGER

The Paul Gilbert Signature AF2 AIRPLANE Flanger is two pedals in one package. One section is a traditional chorus flange (TAXI); the other is an insane (TAKEOFF) flange (hence the "AIRPLANE" moniker), which provides virtuoso guitarist Paul Gilbert's own "Crazy Flange" sound. Time to buckle up. The AF2 features Manual (delay time), Speed (modulation speed), Range (depth of modulation), and Enhance (feedback) controls.

AF2

- controls
 - i/o's

 - power source
- TAXI : Flange/Chorus Type Modulation Effect
TAKEOFF : Jet Sound (shifting pitch up and down)
MANUAL : Delay Time, SPEED : Modulation Speed, RANGE : Depth of Modulation
ENHANCE : Feedback, EFFECT ON/OFF Switch, TAXI/TAKEOFF Switch
INPUT/OUTPUT (Mono)
180(W) x 134(D) x 65(H) (mm)
Operates with a DC 9V AC Adapter

- Paul Gilbert Signature Flanger "AIRPLANE FLANGER"-

A more affordable version of our WD7 pedal, the WD7JR presents a high quality wah-wah pedal at a great price. Activates with minimal pedal pressure. Auto Off Delay control allows you to delay the end of wah-wah effect after your foot leaves the pedal, for smooth transition and phrasing. Features a maintenance-free optical sensor - no need to worry about producing unwanted noise from the volume pot. Also includes Level control for volume adjustment.

WH10V2
Classic Wah Pedal

Range switch : Guitar 350Hz - 2.2kHz
Bass 175Hz - 1.1kHz
Depth control : +6 - +12dB

WH10V2

The upgrade you will notice is the die-cast metal construction, replacing the original plastic case. Feel free to dance on this sucker now—it can take anything you dish out. The WH10V2 features the same multiple feedback opamp circuit as the original, a feature rarely found in today's wah pedals. It also has a depth knob to control to level of the wah effect and a dry out for mixing a dry signal with the wah sound. The WH10V2 has a unique tone character setting it apart from all traditional wah pedals, as well as some modern tweaks so your sound keeps changing with the times.

WD7JR
Weeping Demon Junior

WD7
Weeping Demon

WD7JR/Auto-Off Delay

Adjusts the time delay from when the pedal is returned until the effect switches off. Turning this clockwise will increase the time delay, preventing the effect from turning off while you are operating the pedal. Turning this counterclockwise will make the effect turn off more quickly, so that it will turn off immediately when you return the pedal.

WD7/Auto-Off Delay

In the AUTO SWITCH mode, you can set the effect-off either on standard instant off when the prdal is returned to the full up-right position or a delayed-off by turning the control clockwise.

TS808HW Hand-Wired Tubescreamer

The Ibanez Tubescreamer, in its many versions and forms, can be found on pedal boards in every corner of the globe, on arena stages and in small studios and bedrooms. Its warm overdrive is a sound many players, from advanced to beginner, could never do without. Now, it gets even better with the release of the TS808HW, a Hand-Wired deluxe Tubescreamer built with the pro musician in mind.

Encased in a special, heavy duty metal box, the TS808HW is Hand-Wired with select JRC4558D chips (same as the revered and often imitated TS808) and uses Japanese high-end MOGAMI OEC cable (AWG21). Equipped with True Bypass, this Tubescreamer sends pure guitar excitement to your amplifier with no tonal loss whatsoever. This is, by far, the most evolved Tubescreamer ever created.

TS808 The Original Tubescreamer

Modeling and boutique pedal makers have copied the smooth and full tone of this pedal countless times. Now you can have Ibanez's faithful reissue at a price that doesn't break the bank. The reissue features the same JRC4558D IC chip and analog circuitry as the original. Controls include overdrive, level, and tone controls.

FL9 Flanger

Same circuitry and coveted flanging effects of the original '80s unit but constructed to closer tolerances for more consistency from unit to unit. If you've been hunting for an original but couldn't find one, or couldn't afford a high asking price, now's your chance to bag this '80s favorite. Might even be better than the original.

AD9 Analog Delay

The Ibanez AD9 Analog Delay Effect Pedal uses a compander with pre- and de-emphasis for an exceptionally clean delay. Time and level controls allow mixing between dry and delayed signals. Repeat control lets you adjust the number of repeats without runaway. 2 outputs enable dry and delayed signals to be routed separately.

TS9 Tubescreamer

The Ibanez TS9 Tubescreamer is a reissue that's just like the original in so many ways. Same factory, same components, same housing, same famous seasick-green paint, and the same crankin' overdrive that made the original one of the all-time classic pedals. Guitar Player called it the best. Plug it in. Crank it up. You'll hear what all the fuss is about. Tone, drive, and level controls.

CS9 Stereo Chorus

When it comes to compact effects, nine is the magic number. By popular demand (and the understandably escalating prices of the originals), Ibanez has reissued its popular CS9 chorus featuring the original circuitry. If you missed out on getting one of these classics the first time around, now is your chance.

DC3&DC5 Splitter cords for powering 3 or 5 pedals from one adapter.

TS9DX Turbo Tubescreamer

The Ibanez TS9DX Turbo Tubescreamer Effects Pedal features the same circuit as a TS9 Tubescreamer and also offers 3 new settings for increased low end crunch: +, Hot, and Turbo.

AC109 Standard 9-volt 200mA regulated adapter for Ibanez compact effects.

CLASSICS

Sometimes it's best to keep it simple. Which is why, in a world of dizzying often over-complex technology, the durable, dependable and simple stompbox continues to be the most widely used and effective means to expand, color, distort, mutate, sustain and twist tone.

TONE-LOK

EFFECTS PEDALS

On the outside, Tone-Lok effects are equipped with our exclusive "set and forget" Push-Lok rotary pots. Push the knobs down and your tone settings lock securely inside the case. No more lost settings or knobs broken. On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes encased in cool looking, road-tough metal boxes at prices the working player can afford.

AP7 Analog Phaser

The addition of the AP7 to the Tone-Lok series has brought with it the warm midrange sounds of a true Analog Phaser. The pedal features speed, depth, and feedback controls as well as a 3-way switchable phase circuit. When switched to 4-stage phasing, the pedal recreates the sounds of a vintage phaser. When switched to 8-stage phasing, the pedal produces more aggressive and deep phasing characteristic of modern pedals. This setting works best on more distorted lead sounds.

TC7 TRI-Mode Chorus

Are you bored with normal chorus pedals? If so, the Ibanez TC7 will bring the thrill back. The TC7 can create three types of chorus with the combination of two individual chorus circuits. It truly expands your guitar's expressiveness.

SM7 Smash Box

The Smash Box is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with obscene amounts of gain, tight low end, and searing highs, the Smash Box is the heavy rock sound for the contemporary guitarist. Special "VOID" noise gate and "EDGE" (sharp/smooth) controls let you handle anything from all-out shred to machine-gun metal riffs and rhythms.

SH7 7th Heaven

Designed specifically for 7-string guitars with the input from some of Ibanez's hottest 7-string players, the SH7 7th Heaven distortion pedal accentuates the low-end girth of the 7-string while reducing unwanted string noise. A special mode switch allows you to choose between two different distortion voicings while Lo, Hi, Drive, and Level knobs give you total tone control. An absolute must-have effect for replicating the best 7-string sounds of others or creating your own individual tones.

DS7 Distortion

The most versatile Ibanez distortion pedal ever, capable of producing a wide range of smooth, dynamic overdrive tones. From a subtle tonal nudge to walloping rock'n'roll crunch, the DS7 delivers days of sustain and gobs of gain.

TS7 Tubescreamer

The Tubescreamer isn't just a stompbox, it's an institution. Our latest generation Tubescreamer, the TS7, is no exception. With the Tubescreamer's classic subtle-but-smooth overdrive, the TS7 expands the expressiveness of your guitar while maintaining its tonal integrity. Tone adjustments are provided by the classic three knob configuration with an added "hot" switch for an extra gain boost.

FZ7 Fuzz

Far out! A complete 60's flashback with none of the drawbacks, the FZ7 is the ultimate in psychedelic fuzz. With the FZ7's tone, drive, and level controls, it's never been easier to get the right retro tones. You can even engage the DAMAGE switch for that ratty, broken speaker sound. Yeah, baby, yeah!! Dial in, tune up, drop down or whatever turns you on.

DE7 Delay/Echo

Add new dimensions to your sound with the DE7 Delay/Echo pedal. Get the best of both worlds: high tech digital sounds comparable to expensive rack units or warm vintage tape echo sounds—all with a simple flick of the switch. TIME, REPEAT and LEVEL controls help you dial in just the right amount of delay, while stereo outputs can be used for a more spacious sound. With a range of 30ms to 2.6 seconds, the DE7 is the only sound solution for every playing situation.

PH7 Phaser

Designed to emulate the effect of a rotating speaker, the PH7 has a switchable phase circuit capable of either four or eight stages of smooth phasing. With these two very different tonal modes, you can go from a subtle shimmer to all out 70's "Let's Get Funky" phasing.

PM7 Phase Modulator

If you've gone through one phase after another, maybe it's time for the final phase. The PM7 Phase Modulator offers three types of waveforms to give you everything from classic phaser to DJ effects to toy ray gun sounds. Since good things come in threes, the PM7 also has three phase stages: vintage, deep and dry, and deep and pronounced. With some minor tweaking, the PM7 goes from traditional to 21st century and beyond.

AW7 Autowah

There are autowahs. And there are autowahs. But the Tone-Lok AW7 isn't just any autowah. It's got standard wah where both the highs and lows are cut and it's got a wah setting where only the highs are cut. And it's got distortion, Band Pass Filter provides the sound of a standard wah pedal left at one setting (a favorite wah pedal technique of Joe Satriani). You can even change the chain order of the effects to get different tones: either distortion to wah or wah to distortion.

LF7 Lo Fi

The first dedicated filter pedal for the guitar, the LF7's voltage controlled analog high and low pass filters allow you to emulate transistor radio and megaphone type sounds. Best used at the end of a signal chain in combination with other pedals, this ticking time bomb creates wide soundscapes of far out tones that previously required a massive rack of analog electronics. The Lo Fi also performs equally well with vocals, drum machines or in any "mix-down" context.

PD7 Phat-Hed Bass Overdrive

Why let guitarists rule the stage? Loaded with growling low-end distortion, the PD7 levels the playing field for the rock bassist. The PD7 is armed with three pre-amp style voicings and an attack control switch, which accents the amount of harmonic content in your sound. With DRIVE, LO, HI, and LEVEL knobs, dialing in a thunderous bass sound has never been easier.

SB7 Synthesizer Bass

If you're looking for new tones or you're still smoldering with resentment against synth bass keyboard players, the SB7 is the ticket. You've got real time feel—in other words no annoying tracking errors and delays. You can even play chords.

DESKTOP AMPS

Into jamming at your desk? Though impossibly small with its 3" speaker, the sound level on our desktop amp packs more than enough punch at 1.6 watts. Adjust the EQs (Treble and Contour) to your liking, or flip the Hot Switch for heavy distortion for electric guitar (Model DAG1) or a mid-boost jump for electric bass (Model DAB1). And by plugging into both the headphone output and AUX input, you can jam along with music from your portable disk player or computer! Both models are powered by either a 9V battery or the included 12V AC adapter.

DAG1 Desktop Guitar Amplifier

- output power 1.6W @ 8Ω
- speaker unit 3" speaker
- controls Distortion On/Off Switch, Treble, Contour, Volume
- i/o's Guitar Input, Headphone, CD Input
- size 102(W)x116(H)x63(D) (mm)
- power source 9V battery (sold separately) 12V AC Adapter included

DAB1 Desktop Bass Amplifier

- output power 1.6W @ 8Ω
- speaker unit 3" speaker
- controls Mid-Boost On/Off Switch, Treble, Contour, Volume
- i/o's Bass Input, Headphone, CD Input
- size 102(W)x116(H)x63(D) (mm)
- power source 9V battery (sold separately) 12V AC Adapter included

TUNERS

When you make 6-string, 7-string and 8-string guitars for players who use all kinds of alternate tunings, you'd better be very serious about tuning. We are. Our wide variety of compact tuners offer strict accuracy, easy operation and our famous Ibanez reliability.

LU20

LU20 BK

LU20

Pedal Tuner

This tuner features a durable diecast housing and LED display with a three-color indicator for maximum visibility from the floor.

Clip Tuner

Both Ibanez clip tuners, PU20 and PU10, are designed to tune electric and acoustic guitars, basses, violins, banjos, mandolins, and more without interference from ambient room noise. It does it all without the use of wires, microphones or pickups. Tuning in noisy environments is a snap because the unique, flexible clamp actually feels the instrument's vibration instead of relying on sound. PU20 features backlit large LCD display for maximum visibility even in the dark stage. PU10 features the 4 hinges that allow a perfect view of the tuner's LED display from nearly any angle.

* Black and Silver colors are available in PU10.

PU20

PU10 SL

PU10

RU10

RU10 WH

RU10 RD

RU10

Jam Tuner

There is no doubt that tuning is important. However it is just preparation, when your goal is to be playing guitar and having fun. With the Ibanez RU10, Jam Tuner, you can do both without firing up your amp. Besides functioning as a chromatic tuner, the RU10 combines a metronome and the Rhythm Play function that features preset rhythm patterns to play along with. The gain control enables you to produce an amazing, real deal distortion sound out of the built-in speaker, letting you jam right away.

LU10

Chromatic Tuner

This tuner is designed for electric guitars and basses, as well as acoustic guitars. The clever LU10 is an easy-to-use tuner with an LED display including a large, bright note display. It's very easy to work with.

GU1

Automatic Tuner

The GU1 is the first guitar / bass auto tuner with strobe displaying mode. In needle displaying mode, the meter moves the same as the tuner ever. In strobe displaying mode, the meter goes round and tune. The operation is very simple even for beginners.

GU40

Automatic Tuner

The colorful GU40 guitar tuner from Ibanez features hands-free tuning. This no hassles auto tuner is fast and accurate and works with guitar, bass or almost anything that shares the same tuning. It even has seven tuning notes for 7-string guitars. The GU40 guitar tuner has a built-in mic for fast and accurate metering.

CU40

Chromatic Tuner

MU40

Metronome Tuner

The CU40 chromatic guitar tuner from Ibanez is fast and accurate and works with guitar, bass or almost anything else. The CU40 has a large LCD display, LED 'flat' and 'sharp' guide lights and a built-in mic for fast and accurate metering.

The dual purpose Ibanez MU40 Tuner/Metronome indicates pitch with both an LCD needle display plus red flat and sharp LEDs plus a green in-tune LED. Designed for electric guitars, basses and acoustic instruments. Built-in metronome with speaker, mute switch, and headphone input. Ideal for teachers and students.

CABLES

Series PSC

PCOCC stands for "Perfect Crystal by Ohno Continuous Casting Process". This material has remarkable lower resistance and transfers far more High-Frequency signal than TPC or OFC cables. The clear and precise sound PSC cables provide are perfect for any musician.

STANDS

ST201

Folding guitar stand for Electric/Acoustic Guitar and Bass.

ST301

Tubular guitar stand with folding tripod for Electric/Acoustic Guitar and Bass.

ST101

Compact size folding guitar stand for Electric/
Acoustic Guitar and Bass.

PICK HOLDER

PHI01 Removable, Reusable and Reliable Guitar Pick Holder

The Pick Holder can hold your picks tightly, and easily removed. The Pick Holder is a detachable sticker to be installed on your guitars and basses. The Pick Holder is reusable. If it seems to lose it's adhesion, gently wash with water, reapply, and it will be as good as new!

PICKS

Ibanez picks feature traditional styles, artist signature models and special non-slip “Grip Wizard” picks.

Basic Color Series

Ibanez covers the basic picks with orthodox shape color. You can choose from 6 kinds of shapes.

Ibanez Classic Design Series

Three of Ibanez' legendary icons are now featured on picks – “Flying Finger,” “Tree of Life” and a new design derived the “Ibanez checkmark”.

Grip Wizard Series Rubber Grip

Non-slip rubber softly fits your finger. Available on polyacetal, or super hard PPS material picks.

Polyacetal

Grip Wizard Series Sand Grip

Dense and wide surface sand provides hard and sure grip.

Edge-Zero Tremolo

The Edge-Zero has a sharp knife-edge for extremely accurate tremolo playing. This tremolo also uses Ibanez innovations to keep string action constant and the bridge surface smooth. The specially designed arm socket prevents unnecessary wobble from the arm while providing full control over the arm's torque.

ZR-2 Tremolo

The ZR-2 is a revolutionary tremolo system. It plays incredibly smooth through the use of its ball bearing mechanism. This also keeps the string action constant, even during the most rigorous tremolo use. The top side features a smooth finish for total hand comfort, and the tremolo arm snaps in for quick setup.

ZPS3 Zero Point System

The ZPS3 is the next stage of zero point systems. Made of lightweight Duralumin, the addition of two outer springs makes the guitar easier to tune and provides much greater tuning stability. In fact, the other strings will stay in tune even if you break a string. If you prefer a full floating tremolo setup, simply remove the stop bar.

Spring Mute

Some might think it's inevitable for tremolo springs to resonate, but that's not the case with the Ibanez Prestige. The spring-muting rubber eliminates noise from the spring, providing only clean and cutting sound.

ZPS3 Zero Point System

The ZPS3 is the next stage of zero point systems. Made of lightweight Duralumin, the addition of two outer springs makes the guitar easier to tune and provides much greater tuning stability. In fact, the other strings will stay in tune even if you break a string. If you prefer a full floating tremolo setup, simply remove the stop bar.

SynchroniZR Tremolo

The SynchroniZR provides all the innovations of the ZR tremolo in a non-locking design. The one-piece saddle construction minimizes unnecessary wobble and loss of string vibration, and the ultra-light Duralumin tremolo arm keeps the bridge stable while playing. The same intonation and adjustment features of the ZR-2 make this a top-notch choice for any kind of player.

ZPS-FX System

The ZPS-FX is the simplified alternative to the ZPS3 system. This spring system allows switching from floating to non-floating tremolos with the turn of a knob on the back. Coupled with the SynchroniZR, the ZPS-FX offers total sonic control and the pinnacle of tuning stability.

Tight-Tune Bridge/Tailpiece

Solid as a rock, the Tight-Tune bridge and tailpiece were designed to lock down securely and prevent any kind of wobble or movement. Each saddle is locked into the base plate, and the bridge is anchored by stud bolts into the body of the guitar. Furthermore, the studs are also locked onto the base plate so that the maximum vibration from the string is transferred to the body.

Tight-End Bridge

The Tight-End bridge integrates every aspect of the bridge design in rigidity and accuracy. Saddles are firmly locked onto the base plate for maximum string vibration, and remain perfectly linear during intonation adjustment for the most accurate set up. The saddle height can be adjusted individually by one screw. Also, the top side of the bridge is smooth finished. So if you play hard, the Tight-End bridge will forgive you and your hands.

MR4 Mono-Rail Bridge

The Mono-Rail Bridge is the ultimate in string isolation for bass. Each saddle is independently and securely locked down to the body for maximum vibration transfer and no interference. One screw controls the height of each saddle for easy adjustment.

GB SPECIAL	GB SPECIAL	N	H	AL	Neck version of above.
HFS1	HFS1	N	S	C	Single coil's brightness without the susceptibility to hum noise.
HFS2	HFS2	B	S	C	Single coil's brightness without the susceptibility to hum noise.
HGD1	Hot Grinder 1	N	H	AL	Hot, but sharp enough to hear pick bites the strings.
HGD2	Hot Grinder 2	B	H	C	Hot, but sharp enough to hear pick bites the strings.
HS1-N	HS1-N	N	S	AL	Humbucker sized single coil pickup. Loud and crunchy to cut through the mix.
HS1-B	HS1-B	B	S	AL	Humbucker sized single coil pickup. Loud and crunchy to cut through the mix.
INF1	INFINITY 1	N	H	C	Versatile and responsive with warm classic tone and added output.
INF2	INFINITY 2	B	H	AL	Enhanced midrange output. Alnico-5 magnet for individual string clarity. Excellent dynamics.
INF3	INFINITY 3	N	H	C	Provides the dynamic sound for chording and rhythm.
INF4	INFINITY 4	B	H	C	Brilliant lead pickup. Warm sounding with good harmonics.
INF51	INFINITY SINGLE 1	M	S	AL	Warm single coil tone with added output.
INF53	INFINITY SINGLE 3	M	S	C	Traditional sounding yet high output. Designed to work with humbuckers in the split position.
LZ1-N	LoZ-N	N	H	C	High output yet low noise, active pickup operated by AA Batteries (3 volts)
LZ1-B	LoZ-B	B	H	C	High output yet low noise, active pickup operated by AA Batteries (3 volts)
LZ3-N	LoZ-N	N	H	C	Active Pickup. High-output fat sound, yet tweaked to produce a balanced clean sound.
LZ3-B	LoZ-B	B	H	C	Active Pickup. High-output fat sound, yet tweaked to produce a balanced clean sound.
LZ4-N	LoZ-N	N	H	AL	Active Pickup. Wide dynamic range from fat & heavy to bright & loud.
LZ4-B	LoZ-B	B	H	C	Active Pickup. Wide dynamic range from fat & heavy to bright & loud.
LZ7-N	LoZ-N	N	H	C	Seven-string version of LZ3 pickup.
LZ7-B	LoZ-B	B	H	C	Seven-string version of LZ3 pickup.
LZ8-N	LoZ-N	N	H	C	Eight-string version of LZ3 pickup.

LZ8-B	LoZ-B	B	H	C	Eight-string version of LZ3 pickup.
PP1-N	PP1-N	N	H	AL	Tube construction of the pole-piece provides quick response, clarity and added harmonics.
PP1-B	PP1-B	B	H	C	Tube construction of the pole-piece provides quick response, clarity and added harmonics.
PSND5	PSND5	M/N	S	AL	High output with complete clarity.
PSND1	PSND1	N	H	C	High output in the neck position with no "muddiness."
PSND2	PSND2	B	H	C	High output with enhanced harmonics.
PSND3	PSND3	N	H	AL	High-output with plenty of clarity.
PSND4	PSND4	B	H	C	High-output works for both lead and rhythm.
S1	SINGLE 1	M/N	S	AL	Traditional sounding, but high output single coil with Alnico-5 polepieces for even string output. Designed to work with humbuckers in the split position.
S58	SUPER 58	A11	H	AL	Classic, warm and versatile. Handles both jazz and rock without feedback.
S58C	SUPER 58 Custom	A11	H	AL	Classic, warm and versatile.
SL58	SILENT 58	A11	H	AL	Classic, warm and versatile. Handles both jazz and rock without feedback.
ST2	Short Tracer	M	S	AL	Alnico magnet provides full output in low profile setting.
TDB1	True-Duo Buckler	B/N	H	C/AL	Designed for switching between genuine double and single-coil sound in one pickup.
TDB2	True-Duo Blast 1	N	H	C/AL	Same True-Duo constructions as True-Duo Buckler, but the wiring enables True-Duo function as a pair, Bridge and Neck.
TDB3	True-Duo Blast 2	B	H	C/AL	Same True-Duo constructions as True-Duo Buckler, but the wiring enables True-Duo function as a pair, Bridge and Neck.
V7	V7	N	H	C	Tight, but bright. Very dynamic for chording and rhythm.
V7C	V7 Custom	N	H	AL	Smooth and dynamic tone with warm mid-range.
V8	V8	B	H	AL	Warm yet articulate lead pickup with enhanced overtones. Good harmonics without excessive brightness.
V8C	V8 Custom	B	H	C	Rich, harmonic tone with clarity in low-end.
V77	V77	N	H	C	Seven-string version of V7 pickup.
V77C	V77 Custom	N	H	C	Seven-string version of V7C.
V87	V87	B	H	C	Seven-string version of V8 pickup.
V87C	V87 Custom	B	H	C	Seven-string version of V8C.
VK1-DT	VK-Down Tunz	N	H	AL	High output yet clarity in the high end with V bar polepieces.
VK2-DT	VK-Down Tunz	B	H	AL	High output yet clarity in the high end with V bar polepieces.
IBANEZ BASS PICKUPS					
ACHB-2	ACHB-2	B/N	H/P	C	High output humbucking pickup.
ADX5	ACTIVE DYNAMIX 5	B/N	H/A	C	Quiet, dynamic, punchy sound on all 5 strings. Two different sized bobbins provide even string output. Individually calibrated for neck and bridge positions.
ATK	ATK TRIPLE COIL	B	H/P	C	Heavy bottom and natural high end.
DXH-5	DYNAMIX-5	B/N	H/P	C	Powerful with good midrange punch.
EXF-4	EX FULL RANGE 4	B/N	H/P	C	Balanced tone and sound among each string.
EXF-5	EX FULL RANGE 5	B/N	H/P	C	5-string version of EXF-4.
PFR-4	PASSIVE FULL RANGE	B/N	H/P	C	Powerful full range pickup with added low mids.
PFR-5	PASSIVE FULL RANGE	B/N	H/P	C	Powerful full range pickup with added low mids.
PFR-AL4	PASSIVE FULL RANGE	B/N	H/P	AL	Powerful Alnico magnet pickup with exceptional clarity and very even response.
PFR-AL5	PASSIVE FULL RANGE	B/N	H/P	AL	5-string version of PFR-AL4.
PSJ	POWER SINGE J	B/N	S/P	C	Powerful single sound with sharpness.
PPD4	POWERPOLE DUAL COIL	B/N	H/P	C	Passive bass sound with plenty of punch.
PSNDJ	PSNDJ	B/N	H/P	C	High output with added highs.
PSNDP	PSNDP	B/N	H/P	C	High output with plenty of punch.
SFR-GWB	SONIC FULL RANGE	B/N	H/P	C	Custom wound for GWB35. Quick attack, superior dynamics and added highs.

Frequency Response Curves

— Bass Boost/Cut — Mid Boost/Cut — Treble Boost/Cut
